SUMMARY

Highly motivated observational astronomer with an extensive background in space based near infrared and optical spectroscopy and image analysis, as well as object detection and photometry of faint astrophysical sources. Skilled in image processing and algorithm development for calibration and data reduction imaging pipelines. Seeking to apply expertise in algorithm development and data analysis in the near infrared to drive advancements in astrophysical technologies.

EDUCATION

UNIVERSITY OF MASSACHUSETTS, AMHERST Amherst, MA
Ph.D. in Astronomy September 2023
Advisor: Dr. Kate Follette
Dissertation: "Probing the Physical Mechanisms Responsible for Brown Dwarf and Giant Planet Formation"

UNIVERSITY OF MASSACHUSETTS, AMHERST Amherst, MA
M.S. in Astronomy May 2021

HAVERFORD COLLEGE Haverford, PA
B. S. cum laude in Astrophysics May 2017
High Honors in Astrophysics
Thesis: "VLA Observations of the Magnetic Field of the Smith High Velocity Cloud"

WORK EXPERIENCE

NORTHROP GRUMMAN Linthicum, MD
Principal Data Scientist October 2025 – present

- Developed python-based data processing pipelines for reading, cleaning, and visualizing device performance metrics within a jupyter notebook framework
- Build plotly-dash GUIs to visualize device-under-test performance statistics for quicklook data assessment and to make data-driven decisions on test direction and processes
- Work in cross-disciplinary team with data scientists, physicists, test engineers, and software developers serving as a point of contact for users of data analysis tools. Presented reports on tool development and analysis results to larger team with a wide range of technical comprehension.

SPACE TELESCOPE SCIENCE INSTITUTE Baltimore, MD
STScI Prize Postdoctoral Fellow July 2023 – October 2025

- 50% scientific research + 50% pipeline development and data analysis for the Nancy Grace Roman Space Telescope.
- Deputy Lead of the Roman Telescope Branch calibration block. Work in a cross-disciplinary team with Software Engineers, Scientists, and Analysts within the Data Calibration and Pipeline Development domains.
- Developed statistical algorithms to characterize and reduce noise by 20% in multi-TB optical imaging datasets for the Roman Wide Field Instrument (WFI). Collaborate on robust algorithmic integration and deployment of the Python-based data calibration pipeline to ensure high performance and accuracy as a member of a four-person team.
- Lead technical reports and documentation on the preprocessing algorithm for noise reduction in WFI imaging data. Presented reports to multiple stakeholders, including the NASA Roman Mission. Co-authored additional 2 technical reports on data calibration and science validation of data products.
- Conducted novel research on planet formation using multiwavelength spectroscopy from the James Webb Space Telescope. Developed advanced image processing and analysis pipeline to extract faint astrophysical signals from complex, high dimensional telescope datasets, significantly improving sensitivity in debris disk detections.

UNIVERSITY OF MASSACHUSETTS, AMHERST Amherst, MA
NASA Earth and Space Science and Technology Fellow September 2022 – July 2023

- Created CASPAR, the largest database of stellar and substellar accretion measurements. Standardized catalog entries to ensure data consistency and improved data retrieval resulting in 17% reduction in object variability. Implemented customized linear regression models using pandas and scikit-learn machine learning tools to analyze statistical trends resulting in scientific publication (Betti+2023).
- Built Python-based data reduction pipelines for flux calibration and data visualization to analyze near infrared spectroscopy of brown dwarf stars, detecting features at the 20% level, and resulting in scientific publication (Betti+2022b).

UNIVERSITY OF MASSACHUSETTS, AMHERST Amherst, MA
Graduate Research and Teaching Assistant September 2017 – September 2022

- Developed image reduction pipeline, performed flux calibration, data analysis, and simulation modeling to visualize and robustly detect high contrast and high resolution imaging and spectroscopy of circumstellar disk environments, resulting in publication (Betti+2022a). Designed Python-based algorithm to improve distortion and amplifier offsets in image data.
- Built full reduction and analysis pipeline from IDL to Python for the TolTEC Clouds To Cores Legacy Survey for the Large Millimeter Telescope to predict object detection and feature extraction using k-nearest-neighbors and watershed image segmentation in simulated datasets, resulting in scientific publication (Betti+2021).
- Assisted teaching and mentoring research based observational astronomy courses. Observed at high altitude sites, such as the 0.9 m WIYN telescope at Kitt Peak Observatory. Commissioned Amherst College 12" Schmidt-Cassegrain telescope to image guiding and focus.

HAVERFORD COLLEGE Haverford, PA
Thesis Research Writer June 2017
Undergraduate Research Assistant September 2015 – May 2017

NATIONAL RADIO ASTRONOMY OBSERVATORY Green Bank, WV
Research Experience for Undergraduates Intern 2015

PROFESSIONAL DEVELOPMENT AND TECHNICAL SKILLS

Machine Learning/Comprehensive Python for Data Science, Accelebrate, November 2024
Programming languages: Python, IDL, LaTeX, (basic) SQL
Machine Learning Libraries: scikit-learn
Version control: GitHub/GitLab/Grit
Software applications: Confluence, JIRA, Microsoft Office Suite
Data Visualization and Analysis Tools: Jupyter Notebook, NumPy, Pandas, matplotlib, CASA, SAOImage ds9, yt, pyKLIP, MCFOST, photutils, specutils
Telescope data reduction pipeline development (Roman, LMT, LBT/LMIRCam)
Multiwavlength Data Reduction Experience:

- Optical Imaging: WIYN 0.9 m telescope
- IR Imaging: LBT, APO, IRTF, JWST
- IR Spectroscopy: SOAR
- Sub-mm Interfermetry imaging: Atacama Large Millimeter Array
- Sub-mm imaging: Large Millimeter Telescope Alfonso Serrano
- Radio Interfermetry imaging : Very Large Array

Observing Experience:

- Keck I/LR
- IS
- Southern Astrophysical Research Telescope/TripleSpec 4.1
- Apache Point Observatory/TripleSpec
- IRTF/iSHELL
- Kitt Peak Observatory 0.9 m WIYN telescope/HDI
- 11" al-az and equatorial Schmidt-Cassegrain Amherst College telescopes including the SBIG CCD

PRESENTATIONS & WORKSHOPS

Talks

National Capital Area Disks Meeting #8, Carnegie Science Earth and Planets Laboratory, Washington, DC — March 2025
"Detection of Icy Volatiles in β Pictoris using JWST/NIRSpec"

Star and Planet Formation Seminar, Space Telescope Science Institute, Baltimore, MD — August 2024
"Water Ice in the Debris Disk of β Pictoris"

Star and Planet Formation Seminar, ESO Headquarters, Garching, Germany — February 2024
"CASPAR: Characterizing Accretion across the Brown Dwarf Regime'"

Planet and Star Formation Tea, MPIA, Heidelberg, Germany — December 2023
"CASPAR: Characterizing Accretion across the Brown Dwarf Regime"

American Astronomical Society Winter Meeting, Seattle, WA — January 2023
"Characterizing Accretion and Formation Mechanisms across the Brown Dwarf and Planetary Mass Regimes"

Planet and Star Formation Tea, MPIA, Heidelberg, Germany November 2022
"NIR Accretion Signatures in the Circumbinary Planetary Mass Companion Delorme 1 (AB)b"
Planetary Lunch Series, Massachusetts Institute of Technology, MA October 2022
"Observing Water Ice in the AB Aurigae Transitional Disk"
Northeast Star and Planet Formation 2022, Wesleyan University, CT July 2022
"The Role of Environment in Core Evolution"
Cool Stars 21: Gaia and Spitzer's Neighbourhood Watch Program: From Stars to Brown Dwarfs to Planets Splinter Session, Toulouse, France July 2022
"NIR Accretion Signatures in the Circumbinary Planetary Mass Companion Delorme 1 (AB)b"
In the Spirit of Lyot 2022, Leiden, Netherlands June 2022
"Mapping Icy Grains in the Circumstellar Disk around AB Aurigae"
Five Years after HL Tau: A New Era in Planet Formation Conference, Virtual December 2020
"Mapping Icy Grains in the Circumstellar Disk around AB Aurigae"
Southern Maine Astronomy Club Public Lecture, Virtual November 2020
"Formation of Exoplanets in Circumstellar Disks"
Past, Current and Future Galaxy Surveys. CANDELS Meeting and TolTEC Workshop, University of Massachusetts, Amherst, MA, October 2018
"Environmental Effect on Interstellar Medium in Galaxies across the Cosmic Web at z=0.73"
Physics with Friends, Haverford, PA November 2016
"Gas Clouds in Space"
National Radio Astronomy Observatory Lunch Talk, Jansky Lab, Green Bank, WV July 2015
"Type III Bursts and the Solar Wind"

Posters

Cool Stars 22, San Diego, CA July 2024
"Characterizing Accretion and Formation Mechanisms across the Brown Dwarf and Planetary Mass Regimes"
Extreme Solar Systems V, Christchurch, NZ March 2024
"Coronagraphic JWST/NIRCam Images of the 49 Ceti Debris Disk"
Origins of Solar Systems Gordon Research Seminar, Holyoke, MA June 2023
"Detection of Near-infrared Water Ice at the Surface of the (Pre)Transitional Disk of AB Aur"
Planetary Systems and the Origins of Life in the Era of JWST, Baltimore, MD May 2023
"Characterizing Accretion and Formation Mechanisms across the Brown Dwarf and Planetary Mass Regimes"
Protostars and Planets VII, Kyoto, Japan April 2023
"Characterising Accretion and Formation Mechanisms across the Brown Dwarf and Planetary Mass Regimes"
Cool Stars 21, Toulouse, France July 2022
"NIR Accretion Signatures in the Circumbinary Planetary Mass Companion Delorme 1 (AB)b"
2021 Sagan Exoplanet Summer Virtual Workshop: Circumstellar Disks and Young Planet, Virtual July 2021
"Mapping Icy Grains in the Transitional Disk AB Aur"
2021 Virtual STScI Spring Symposium: Towards the Comprehensive Characterization of Exoplanets: Science at the Interface of Multiple Measurement Techniques, Virtual April 2021
"Mapping Icy Grains in the Transitional Disk AB Aur"
American Astronomical Society Winter Meeting, Virtual January 2021
"Mapping Icy Grains in AB Aur: Constraining Composition, Growth, and Filtration"
American Astronomical Society Winter Meeting, Honolulu, HI January 2020
'The Role of Environment in Core Formation: Predictions for the TolTEC Clouds to Cores Legacy Survey"
American Astronomical Society Winter Meeting, National Harbor, Oxon Hill MD January 2018
"Quantifying the Role of Environment in Star Formation: ISM masses along the Cosmic Web with ALMA"
American Astronomical Society Winter Meeting, Grapevine, TX January 2017
"VLA Observations of the Magnetic Field of the Smith High Velocity Cloud"
Start Talking Science, Chemical Heritage Foundation, Philadelphia, PA August 2016
"Gas Clouds in Space: How the Smith Gas Cloud survived passing through the Milky Way"
Koshland Natural Integrated Science Center Research Symposium, Haverford College, Haverford PA August 2016
"Gas Clouds in Space: How the Smith Gas Cloud survived passing through the Milky Way"
American Astronomical Society Winter Meeting, Kissimmee, FL January 2016
"Probing Solar Wind Turbulence Using JVAS and VLA Calibrator Sources"

Panels

Young Women in Physics Conference, Bucknell University, Lewisburg, PA April 2016
Spoke about experiences as a woman in STEM as one of two undergraduates

Workshops

Circumstellar Disks and Young Planets, 2021 Sagan Exoplanet Summer Virtual Workshop, Virtual July 2021
ALMA Proposal Workshop, Amherst, MA March 2020

JWST Proposal Planning Workshop, Amherst, MA — January 2020
16th NRAO Synthesis Imaging Workshop, Soccoro, NM — May 2018

FELLOWSHIP AND GRANTS

James Webb Space Telescope Cycle 4 General Observer | $130,430 (TBA) — 2025
STScI Prize Postdoctoral Fellowship, Space Telescope Science Institute | $32,000 — 2023-2027
NASA Earth and Space Science and Technology Fellowship | $50,000 — 2022-2023
UMass Amherst Department of Astronomy Research Grant | $500 — 2022
UMass Amherst Department of Astronomy Research Grant | $100 — 2021
UMass Graduate School Dissertation Research Grant | $750 — 2020
Massachusetts Space Grant Consortium Fellowship | $5500 — 2019
Mary Dailey Irvine Graduate Travel Award | $800 (2018), $1192 (2019), $900 (2022) — 2018-2022
Massachusetts Space Grant Consortium Fellowship | $5500 — 2018
Frances Velay Womens' Science Research Fellowship — 2016

OBSERVATIONAL PROGRAMS (*PI)

JWST:
- *13.7 hours (PID 6940, PI: S. Betti)
- 7.2 hours (PID 7313, PI: K. Worthen)
- 17.29 hours (PID 6086, PI: K. Ward-Duong)
- 20.92 hours (PID 6361, PI: K. Follette)
- 4.11 hours (PID 5390, PI: C. Lu)

SOAR 4.1m:
- *2 nights (PID 2023A-267101, PI: S. Betti)
- *3 nights (PID 2022B-171130, PI: S. Betti)
- *2 nights (PID 2022A-336353, PI: S. Betti)
- *4.5 nights (PID 2021B-0311, PI: S. Betti)
- *1 night (PID 2021A-0261, PI: S. Betti)

Hubble Space Telescope:
- 9 orbits (PID 17122, PI: C. Robinson)

APO 4.5m:
- *1 night (2024 JH03, PI: S. Betti)

Keck I:
- 1 night (2022B, PI: K. Follette)
- 1.5 nights (2021B, PI: K. Follette)
- 1 night (2021A, PI: K. Follette)

VLT:
- 6 hours (113.26AR, PI: S. Ringqvist)
- 7.5 hours (113.26J1, PI: D. Dema

TEACHING EXPERIENCE

UMass Precollege Summer Astronomy Program — 2019–2021
Course Head and Coordinator | 2020–2021 — *Amherst, MA*
Organized and ran a 3 week pre-college astronomy course centered around students learning fundamentals of astronomy through lectures and optical data reduction labs; supervised graduate student teachers, ran observing nights, and organized final student presentations.
Lab Coordinator | 2019, 2022
Developed and taught 3-week Python based optical data reduction and analysis lab course. Organized and managed an observing night at the Amherst College Observatory using 11" Schmidt-Cassegrain telescopes with eyepieces and CCDs.

University of Massachusetts, Amherst — 2018–2021
F*CAD Graduate Observational Teaching Assistant | Spring 2018–Fall 2021* — *Amherst, MA*
Astronomy 337 & 341 Observational Astronomy courses: Research based courses using the Smith College 12" and 16" Schmidt-Cassegrain telescope and the 0.9 m telescope at Kitt Peak Observatory. Assisted in teaching & mentoring students in conducting research projects.
Lab Teaching Assistant | Fall 2017
Ran and taught Astronomy 100 Laboratory and Discussion sections. Introduced students to basic astronomy concepts using Stellarium.

Haverford College — 2015–2017
Telescope/Lecture Teaching Assistant | 2015–2017 — *Haverford, PA*
Trained Astronomy 205: Intro to Astrophysics students on 12" Schmidt-Cassegrain telescope. Assisted Astronomy 206: Intro to Astrophysics students on problem sets and coding in Python.
Grader | 2015–2016
Graded Fundamental Physics student problem sets (Fall 2015), Introduction to Electrodynamics student problem sets (Spring 2016), and Waves and Optics student problem sets (Fall 2016), Introduction to Astrophysics student problem sets (Spring 2017)

OUTREACH, SERVICE & ACTIVITIES

Reviewer for: ApJ
Maryland Science Center — 2024-2025
Observatory Volunteer — *Baltimore, MD*

Ran safe solar observing at the Clark Observatory. Set up and operate 8" aperture refractor telescope and dome, engage the public through discussions of solar sunpots, telescope filters, and general astronomy. Ran astronomy-based demonstrations, such as demonstrating the physics of black holes and spectroscopy.. Operate the Science on a Sphere visualization system to showcase and describe solar system bodies in 3D.

Telescope Allocation Committee Member for NOIRLab 2024

Space Telescope Science Institute 2024-2025

Diversity, Culture, Respect Working Group | Feb. 2024–Jan. 2025 *Baltimore, MD*

Part of the DCRWG whose mission is to analyze and address issues of diversity, culture and respect within the STScI Instruments Division. WG disbanded as a result of the executive order issued on January 20, 2025.

JWST Cycle 3 Panel Support Scientist | Feb. 2024

ULLYSES: Continuing the Voyage of Discovery Workshop at STScI March 2024

Science Organizing Committee, Conference Moderator Baltimore, MD

University of Massachusetts, Amherst 2019–2023

UMass Amherst Graduate Student Senate Senator | 2020–2023 *Amherst, MA*

Graduate Women in Stem Sound Bites Cafe Volunteer | 2020–2021

Led discussion and gave presentations about exoplanets and their formation to middle and high school science classes

Department of Astronomy, University of Massachusetts, Amherst 2018–2023

Member of Graduate DEI Committee | 2020–2023 *Amherst, MA*

Grad student-led committee formed to promote DEI within the astronomy department including retention, diversity, and inclusion within all levels of the department.

Faculty Meeting Graduate Student Representative | Fall 2019, Fall 2020

Graduate Student Recruitment Committee | 2018–2022

Astronomy in the Community, University of Massachusetts, Amherst 2018–2020

Interview with an Astronomer | 2020 *Amherst, MA*

Led discussions about social issues in space science and was interviewed for a sixth grade project

Astronomy Day Girl Scout Camp Volunteer | Summer 2018

Ran day long event teaching and leading astronomy activities to kindergarten to middle school girl scouts

Local High School Astronomy Club | Spring 2018

Led discussions and presentations about hot astronomy topics including gravitational waves and black holes for students in high school astronomy

Astronomy Public Observing Program, Haverford College 2014–2017

Astronomy Public Outreach Head | 2015–2017 *Haverford, PA*

Managed and organized the public observing program. Interacted with professional astronomers and astronomy. Delegated jobs and oversaw volunteers at events. Hosted private groups for personal observing by giving talks, leading discussions, and running telescopes.

Public talk: "The Sun: From Birth to Death", March 18, 2016

Astronomy Public Outreach Volunteer | 2014–2015

Ran telescopes and helped with crafts at public observing program

Public talk: "Constellations: What are they and Their Place in Modern Astronomy", March 21, 2015

Haverford College 2014–2017

Koshland Integrated Natural Science Center Student Advisory Committee *Haverford, PA*

Met with the KINSC program coordinator and the faculty to ensure student funding and programs were available for all Haverford students

ORGANIZATION MEMBERSHIP

2016-present: American Astronomical Society
2011-2019: International Dark Sky Association
2016-2017: Society of Physics Students
